

Ineltro Electronics

Ineltro Electronics GmbH has been active on the European market since 1968 and it is one of the largest, privately held companies in the distribution sector. Its job is to provide a platform where the customers and manufacturers can meet.

Business deals are made by people with people.

What we offer?

Active, passive, electro-mechanical and system components from leading manufacturers guarantee the best coverage for your needs. In addition to the high-quality product range, we also attach a great importance to long-term partnership. This allows us to gain additional experience far beyond the pure product datasheet facts. It is an essential part of our service to provide our accumulated experience and market knowledge also to the customers. Our well-established team copes with all tasks regarding all customers' needs with profound understandings, professionalism and skills.

CONSULTANCY

Ineltro offers comprehensive support during product development. Our sales and product managers with several years of experience in their product areas will focus on your specific technical needs. They will advise you on all products in our delivery program. This starts at the design in with the examination of all possible solutions, the selection of appropriate components up to the transition into mass production.

We share our knowledge with you.
