PHILOSOPHY & MISSION STATEMENT

For our customers we are not only suppliers and for our suppliers we are not only customers – we are the connecting partner between both.

Our mission is to establish an intensive and long-term relationship with our business partners based on trust and respect. We count on competence, loyalty, quality and an appropriate knowledge of the market. Due to our size and company structure we are able to act fast and with flexibility according to the needs of our partners. Business deals are finally made by persons with persons. Therefore humans are always number one, as customer, as supplier and as employee. Our attitude towards other people is always fair-minded and human, because only a climate of confidence can create operational excellence. Our teamwork is based on competence and respect, sometimes even friendship. Problems are solved with fairness and in partnership.

CONSULTING

Ineltro offers comprehensive support during product development. Our sales and product managers with several years of experience in their product areas will focus on your specific technical needs. They will advise you on all products in our delivery programme. This starts at the design in with the examination of all possible solutions, the selection of appropriate components up to the transition into mass production. We share our knowledge with you.

WAREHOUSE

The total storage area of our warehouse is 1900 m^2. 1200 m^2 comprised of 1260 pallet locations on 4 high-rack levels and a further 700 m^2 storage area accommodated in 7 modern vertical Megamat carousels.

INTEGRATED MANAGEMENT SYSTEM

Our ISO 9001 and ISO 14001 certified Integrated Management System ensures transparent, companywide processes and consistently high quality in products and services. It supports consistent customer orientation, continuous improvement, process optimization and effective risk and opportunity management, enabling us to continuously enhance operational excellence.

ESG – ENVIRONMENTAL, SOCIAL, GOVERNANCE

We place strong emphasis on ESG principles to manage our sustainability responsibilities. Key performance indicators in the areas of energy, waste, and water are continuously monitored to ensure long-term sustainable development. Particular attention is given to material compliance and adherence to international regulations such as REACH and RoHS. Alongside our Code of Conduct, Ineltro requires partners to uphold ethical and compliance standards. The wide range of measures led to achieving the EcoVadis Silver rating in 2026.
